

Gustavo Zubieta-Calleja

Evaluation of your thesis titled “Human Adaption to High Altitude and to Sea Level. Acid-base equilibrium ventilation and circulation in chronic hypoxia”

Dear Gustavo Zubieta-Calleja

The Faculty has received the assessment report from the evaluation committee. This is hereby enclosed.

As you can see the assessment committee has recommended to the Academic Council that your thesis is rejected.

You now have two options:

1. You can withdraw your thesis. If you choose to do so, you will have an opportunity to, at a later point, hand in a revised version of the thesis. If you hand in a revised version you will need to write and enclose a statement about the outcome of this assessment. You do not have any written right to hand a new version in, you can see the rules in the regulations §2, part 2. See our guidelines. The Faculty has the right to decide if they will take a new thesis under evaluation.
2. You can make a written statement regarding your assessment. This will be sent to the assessment committee for further comments and a rewrite of the assessment if necessary. You will be notified of the committee's response. If you, after this, do not withdraw your thesis, your case will be sent to the Academic Council for final decision. You can read about this in our guidelines §12 and 13.

You are kindly asked to let us know your decision no later than **January 7 2009.**

You are welcome to call or write us if you need any of the above written clarified.

Yours sincerely,
Christina Als Velling
Academic Secretary
